

MASTER OF SCIENCE IN BIOLOGY

(120 credits)

Specialized Biology Courses (at least 60 credits)

Students incorporate specialized biology courses in their study programme for at least 60 credits, with the following distribution:

- 30-36 credits major domain choice (courses in the domain that is most relevant for the master thesis)
- 12-18 credits minor domain choice (courses from the other domain)
- 12-18 credits from a cluster of methodological courses.

Major Domain (30-36 credits) and Minor Domain (12-18 credits):

The students choose one group as major subject, and the other one as minor subject:

Ecological and Evolutionary Biology

Molecular and Physiological Biology

Methodological Courses (12-18 credits):

Individual Practical Exercises (6 credits)

Interactive Seminar (6 credits)

Master Thesis (30 credits)

Optional Courses (take courses adding up to 120 credits)

Students compose a list of courses chosen from the various master programmes available at the K.U.Leuven or at other universities and present this list to the programme director for approval.
